Attempt : 1
Total Mark : 10
Marks Obtained : 10

Section 1 : Coding

1. Problem Statement

Elsa subscribes to a premium service with a base monthly cost, a service tax and an extra feature cost. Assist her in writing an inheritance program that takes input for these values and calculates the total monthly cost.

Refer to the below class diagram:

Input Format

The first line of input consists of a double value, representing the base monthly cost.

The second line consists of a double value, representing the service tax.

The third line consists of a double value, representing the extra feature cost.

Output Format

The output prints "Rs. X" where X is a double value, rounded off to two decimal places.

Refer to the sample output for formatting specifications.

Sample Test Case

Input: 10.0

2.5

5.0

Output: Rs. 17.50

Answer

```
import java.util.Scanner;
```

```
// Parent class to represent a generic subscription
```

```
class Subscription {  
    protected double baseMonthlyCost;  
    protected double serviceTax;
```

```
    // Constructor
```

```
    public Subscription(double baseMonthlyCost, double serviceTax) {  
        this.baseMonthlyCost = baseMonthlyCost;  
        this.serviceTax = serviceTax;
```

```
    }  
}
```

```
// Child class representing a premium subscription
```

```
class PremiumSubscription extends Subscription {  
    private double extraFeatureCost;
```

```
    // Constructor
```

```
    public PremiumSubscription(double baseMonthlyCost, double serviceTax,  
double extraFeatureCost) {
```

```
        // Call the parent class constructor  
        super(baseMonthlyCost, serviceTax);  
        this.extraFeatureCost = extraFeatureCost;
```

```
}  
// Method to calculate the total monthly cost  
public double calculateMonthlyCost() {  
    return baseMonthlyCost + serviceTax + extraFeatureCost;  
}  
}
```

```
public class Main {  
    public static void main(String[] args) {  
        Scanner scanner = new Scanner(System.in);  
  
        double baseMonthlyCost = scanner.nextDouble();  
        double serviceTax = scanner.nextDouble();  
        double extraFeatureCost = scanner.nextDouble();  
  
        PremiumSubscription premiumSubscription = new  
        PremiumSubscription(baseMonthlyCost, serviceTax, extraFeatureCost);  
  
        double totalMonthlyCost = premiumSubscription.calculateMonthlyCost();  
  
        System.out.printf("Rs. %.2f%n", totalMonthlyCost);  
  
        scanner.close();  
    }  
}
```

Status : Correct

Marks : 10/10
